01. Our Story

HOW DRINIQUE CAME TO BE

PAGE 11–14

In 2007 Drinique was born from a family's passion to create the finest reusable drinkware out there.

After years of dedicated research, they changed the game forever...

REDEFINING DRINKWARE

We believe drinkware should do more than simply serve a purpose, it should bring peace of mind and a touch of luxury with every sip.

As pioneers in the industry, we're redefining the perception of reusable drinkware by marrying the timeless elegance of glass with the unbreakable strength of BPA-free Tritan.

Our pursuit for perfection ensures that each piece exceeds the expectations of the most demanding clientele. Whether you're managing a luxury hotel, hosting an elite event or creating memorable dining experiences, Drinique is designed to meet the highest standards of the hospitality industry.

CIRCULAR INNOVATION

But our ambition doesn't stop at drinkware. Our collection extends to thoughtfully designed bento boxes, ensuring your culinary creations remain as fresh as can be. Each item is a reflection of our commitment to durability, quality and practicality.

As we continue to innovate, sustainability remains at the heart of everything we do. By 2025, all Drinique products will be made with 50% recycled materials, and our goal is to become fully circular by 2027.

Every Drinique product represents our commitment to protecting the planet, with each glass saving up to 12 plastic bottles from landfills.

DRINIQUE.
BREAK FREE FROM GLASSWARE.

Enjoy the clarity, durability and feel of glass - without the risks.

02. Sustainability

THE POWER OF CHANGE

PAGE 15—18

We're blending premium quality with eco-conscious innovation as we strive to become the first circular drinkware manufacturer.

This is just the beginning of our journey to a greener, more responsible future.

Driniques commitment to
a *sustainable future*

For us, sustainability is more than a goal. it's at the core of everything we do. We believe in breaking free from what we know and leading the way to a future where premium quality meets eco-conscious innovation.

Our commitment is bold: to be the first circular drinkware manufacturer, producing products from 50% post-consumer materials with end-of-use recycling capabilities. And this is only the beginning.

STEP ONE
50% renewable, 100% responsible

Transforming plastic waste destined for the landfill into something both enduring and beautiful. Because for a product to be truly sustainable, it must first be durable — built to last.

STEP TWO
A new era of recycling

Our products are now able to be returned and mechanically recycled in the USA and EU. This insures that Drinique products don't simply last, but are reborn.

STEP THREE
Leading the way to circularity

Our vision is clear: to create a fully circular product that can be returned and molecularly recycled both in the U.S. and the EU.

With a molecular recycling facility operating in Tennessee and the opening of a new molecular third party recycling facility in France by 2027, we're closer than ever to making this vision a reality.

03. Edition Collection

TIMELESS PIECES

PAGE 19-24

The Edition Collection's timeless cut glass look is a nod to the past. The robust look and feel of this range complements the most upscale of venues and will impress your guests.

Every Edition glass stacks tightly for easy transport and storage. The ribbed exterior and base is stunningly beautiful and durable.

10. Customize

TAILORED SPECIFICALLY TO YOU

PAGE 85-86

Our products are designed to be as unique as your brand. Customize them with your logo or brand name! Anything is possible to add a personal touch and make your brand

truly stand out. Drinique offers in-house pad printing, with competitive pricing and quick turnaround times.

11. Bento Boxes

FUNCTIONAL FOOD BOXES

PAGE 87-98

The classic bento box has been reimagined for the 21st century. These highly functional food boxes are perfect for a variety of

different concepts, from poolside to corporate dining.

Sustainability built in

Bentos are made using recycled content. Reuse is the ultimate form of recycling, but reusing recycled materials has an even bigger impact on your carbon footprint. Our modular, reusable Bentos are a green and affordable alternative to disposable take-away food containers.

Now, more than ever, you need materials that help your brand succeed as the world pivots to a more circular economy. Consumers want products that offer the same high quality they expect while “being Eco friendly.”

The Reuseme Collection

Safe Reusable Service

The Reuseme line of Bentos are ready to serve. Whatever the venue, we have a Bento that will improve the customer experience, while increasing operator ROI and reducing their carbon footprint.

Experience service flexibility with a new way to buffet. Our modular insert trays double as reusable inserts allowing for safe, efficient service. They are also great for grabbing a quick snack or saving part of a meal for later, and helps reduce food waste.

Care and Use Guide

HOW TO TAKE CARE OF YOUR DRINKWARE

PAGE 99-104

Caring for your Drinique products is as important to us, as it is to you. That's why we've developed eco-friendly dishwashing

tips for your Tritan™ drinkware. With a few simple steps, you can help maintain the durability and clarity of your beloved product.

Dishwashing Guidelines

We always suggest you speak with your local dishwasher vendor to conduct a Total Dissolved Solids (TDS) water hardness test. Hard water is extremely corrosive and there are many contributing factors that can affect overall washing results.

Dishwasher chemical recommendations vary for establishments depending on water hardness and if a high or low temperature dishwasher is in use.

The following Use Guidelines will help keep your Drinique Tritan™ products looking their best.

Ecolab is Drinique's preferred ware washing vendor. If using Ecolab, below are options available to support your ware washing program. To help with any concerns please reach out to your Ecolab Representative. Ecolab Customer service can be reached at +1-800-352-5326.

For specific commercial dishwasher chemical recommendations see the 'Care & Use' section of the Drinique FAQ page:
<https://www.drinique.com/pages/faq>

Do not *use*

Detergents and rinse aids that contain phosphates, citric acids, and chlorides. Sanitizers that contain phosphates and citric acid. Chemical provider can locate in their PDS.
Abrasive scotch pads or glass scrubbers that will cause scratching. If using a 3-Tier sink, use a cloth glass polisher instead of an abrasive glass scrubber.
A conveyer washer without a water tank change every 2 hours.

Do *use*

Water Softeners produce better results, protect your wares, and can also help your equipment work more efficiently and last longer.
Rinse out used Drinique Tritan™ products as soon as possible.
Air-dry drinkware before storage as required by FDA Food Code. A pyramid stack can be used to allow for storage and more time to air dry.
Polish glasses on a daily or at least weekly basis to remove any hard water or food protein buildup left over after washing.

Care and Use FAQ

How do I keep my *Drinique* Tritan™ products looking amazing?

Drinique Tritan™ products are tough, but even though they are unbreakable, everything thrives when it's shown a little love...

- 1. Sunblock is great for your skin but it's actually harmful to plastics. After applying sunblock, be sure to wash your hands before you grab your drink.
- 2. Essential Oils might smell good, but they can 'tarnish' or create a haze on high clarity food grade plastics. Avoid prolonged contact with beverages that contain fresh squeezed vegetable or fruit juices, including citrus and citrus rinds. Briefly rinsing with water immediately after use is recommended.
- 3. Like glass, plastic can scratch, so avoid using anything abrasive to clean or wipe off your Drinique Tritan™ products. A soft sponge and kitchen towel to dry will keep it looking beautiful.
- 4. Don't fear the dishwasher! All of our Drinique Tritan™ products are dishwasher safe and do great with the added help of a rinse aid like Jet Dry.

Ask us anything
info@drinique.com

Can I put my *Drinique* Tritan™ products in the dishwasher?

Yes! For sure on the top rack, and as long as your dishwasher doesn't have an exposed heating element on the bottom, you can safely wash them on the bottom rack as well.

Make sure you check, many residential dishwashers do have exposed heating elements.

What dish detergent do you recommend?

Traditional Cascade and Finish brand dish detergents do an excellent job. We also recommend using a rinse aid, like Jet Dry, especially if hard water is an issue.

Can I use heated wash and dry cycles?

Yes, we do at home and our Drinique Tritan™ products comes out spotless every time! Just make sure to keep your Drinique drinkware on the top rack if your dishwasher has an exposed heating element at the bottom

Should I be using a water softener?

Yes, we recommend a water softener whenever possible. Hard water is extremely corrosive and will dull glass, plastic and metal products.

Can I microwave my Drinique Tritan™ products?

Yes. Drinique Tritan™ products are BPA-free and microwave safe, however we recommend limiting cycles to two minutes at a time. Prolonged microwave use can degrade Tritan™ products.
